## Highlights

- Helps reduce the cost of meeting general purpose and storage-intensive demands
- Offers more innovative design and flexible configurations for affordable growth
- Helps deliver enhanced reliability with simplified management backed by IBM service and support

# IBM System x3630 M4

*Affordable dual-use, dual-socket server*

## One server, two uses

With support for the latest Intel Xeon processor technology, the IBM System x3630 M4 offers cost-optimized performance and memory with better energy efficiency. The x3630 M4 helps give growing businesses and branch offices a simpler, more affordable alternative to traditional enterprise offerings without sacrificing performance. For more storage-intensive workloads, the x3630 M4 can provide up to 42 TB of internal storage capacity.

## Flexible options, more affordable growth

The x3630 M4 offers added flexibility and an innovative design to help you more easily and cost effectively add new features as your requirements change. Depending on the model you select, these can include graphic card support, advanced RAID and light path diagnostics, hot-swap hard disk drives, rich remote-management capabilities and a shared or dedicated port for system management. Expandable PCIe slots and NIC ports let you pay for the capabilities as you need them.

## More reliable and easier to manage

Built on IBM DNA, a simple design makes the x3630 M4 easier to manage and upgrade. Embedded RAID with optional hardware RAID, including flash and supercap RAID card support, redundant cooling fan modules and hot-swap power supplies help enhance data protection and system availability. The x3630 M4 is backed by IBM service and support, including access to IBM Systems Director, ToolsCenter support and IBM Integrated Managed Module capabilities.

Select configurations of the x3630 M4 are part of the IBM Express Portfolio™ designed to meet the needs of small and mid-sized businesses. Easy to manage, Express models vary by country.
