

Metered Rack PDU

Overview

The American Power Conversion (APC[®]) Metered Rack Power Distribution Unit (PDU) distributes power to devices in the rack. It has a sensor that measures the current used by the PDU and its attached devices. It can be monitored through Web, Telnet, SNMP, SSH, or InfraStruXure[®] Manager interfaces.

Outlets. The PDU has twelve (12) IEC-C13 and four (4) IEC-C19 outlets.

Digital display. A digital display shows aggregate current being used per bank by the PDU.

Power cord. The 12-ft (3.65-m) power cord terminates with a NEMA L6-30P connector.
