RE: American Power Conversion Corporation
RoHS Certification of Compliance

Dear APC Customer:

APC is committed to providing customers with products that are fully compliant with all regulations, international protocols, and customer standards to which they are subject. The European Union (EU) enacted the RoHS and WEEE directives that are intended to protect the environment and our natural resources. The RoHS directive restricts six chemical substances in certain defined electronic products sold into EU countries and the WEEE directive requires that these products be collected at the end of their lifespan. Please feel free view details of the APC WEEE and RoHS implementation program at the APC web site at: <http://www.apc.com/corporate/stewardship/index.cfm>.

APC considers its Physical Infrastructure Management Products (Environmental Monitoring, NetBotz and related equipment) to be "Monitoring and Control Instruments" as defined in Category 9 of Annex 1a to the WEEE Directive. Under Article 2 (1) of the RoHS Directive, the substances restrictions do not apply to products that fall under Category 9. These products are therefore excluded from complying with the RoHS substances restrictions implementation date of July 1, 2006. APC is continuing to monitor the legal requirements for Category 9 products and commits to compliance with these requirements.

Attachment 1 provides a list of products for which APC is defining as RoHS Compliant pursuant to Category 9.

As a customer who uses our products as components within your own designs or a purchaser of APC products, you have a vested interest in our compliance with the RoHS and WEEE directives. All of us at APC greatly appreciate your continued interest in our company's products.

Sincerely Yours,

APC's WEEE-ROHS Program is on the Web: <http://www.apc.com/corporate/stewardship/index.cfm>

APC bases its RoHS compliance status knowledge on information provided by third parties and has taken and continues to take reasonable steps to provide representative and accurate information, but may not have conducted destructive testing or chemical analysis on incoming components and materials. Compliance with the RoHS Directive means that the product(s) referred above complies with the requirements of EU Directive 2002/95/EC (RoHS), maximum concentration values (MCVs) per Commission Decision 2005/618/EC and subsequent additions to the list of exempted material use applications.
